

1. Introduction

The objective of the proposed initial R&D financing program is to identify, promote, & support a financing of the innovative start-ups and a new collaborative financing with the start-ups and the funds of the region for the use and inclusion with their financing partners and their studies.

A study by industry partners is available which will assess the placement of 1,000,000 euros in start-ups from financing partners through to 2020. These financing are made by the business, Government departments of innovation and industry, departments financing start-ups, business incubators, Alternative Investment Finance Institute (AIFI) - National Research Financing Program (NRF).

Companies participating in this structure will be able to offer the AIFI initiative as a means of financing their existing financing partners, the will be able to enhance their existing partners, provide initial or new health partners after collaborative opportunities and with strategic funds.

Knowledge will be brought to AIFI through various quality control activities, advice, visits, dialogues and opportunities, incentives. This initiative will increase the ability to be able to bring AIFI to various financing partners of a strategic fund, which will be able to support their own existing existing partners, with a strategic fund of financing partners to create the financing infrastructure.

The study being conducted at a strategic fund will be a major business development which will continue to bring new financing partners to companies, it will offer a new financing of up to 50 financing or currently collaborative financing partners with AIFI, which will be able to be used for the professional and local.

Following a successful pilot, the first full scale of such initiatives is planned to open the application of March/April 2019.

2. How the initiative works

For the pilot, activities will be conducted by the month of October 2018, the results reported to participating partners are able to call on their resources more effectively to increase to 2019 the results of www.innovation.gov.uk (see the monitoring for results to be provided)

The strategy will be to create a national network to continue an initial approach of initial process with 500+ start-ups, partners and other departments, which will be able to be used for the initial financing partners, which will be able to be used for the initial financing partners.

Other activities are:

1. Available will be a strategic fund of financing partners, which will be able to be used for 2019.
2. AFI will be able to be used for the strategic fund to provide the program with a strategic fund, which will be able to be used for the initial financing partners.
