BE MORE THAN A NUMBER

APP DEVELOPER

GIRLS ROCK CODING...

My family always had a pretty strong focus on maths and science, but I hadn't ever thought about app development as a career.

I never had the right computer or equipment at home, so I'd spend nights in the library working on apps. Passion creates persistence, so if there's something you want to do, keep going.

In many of the companies I've worked in, I've been the only female iOS App Developer. Girls rock coding. I'm proud to be a female developer and getting to apply these skills every day is a dream come true.
