Choose Maths

BE MORE THAN A NUMBER

FOREST SCIENTIST

IT'S ALL ABOUT THE NUMBERS IN THE WOODS.

I couldn't understand how it would use our maths in the real world until I was presented. After completing a 4-year Master's Degree in Global Change Biology, I'm studying for the practical applications of research and discovery with maths.

Use maths and statistics every day to make sense of our forests and develop sustainable management practices, it's what to do. And I love what to help make the world a better place.
