BE MORE THAN A NUMBER

FOOTBALL ANALYST

COLEMAN, J. (2017)

Coal was always a support of the Oz. I couldn't concentrate at the classroom if sport or math is boring even if it's my step-by-step math teacher in high school inspired me to study something. He had me interested by making my math questions to sport and what I was interested in.

Now I get to use statistics to inform football's game plan every week. From team statistics, match-ups or formations, data is giving a lot of how to approach the match.

AMSI, AMSCA, AMSES AND THE CHOICE MATHS CAREERS PROGRAM ARE ALL PART OF THE CHOICE MATHS PROGRAM. VISIT WWW.CHOICE.MATHS.ORG.AU FOR MORE INFORMATION.
