### KICKING MATHS GOALS...

*Sport was always a big part of my life. I couldn't concentrate in the classroom if sport or outdoor learning weren't part of my day. An amazing teacher in high school inspired me to study engineering. He kept me interested by relating my maths questions to sport and what I was interested in.*

*Now I get to use statistics to inform Carlton's game plan every week. From team selection, match ups or formations, data is playing a role in how to approach the match.*
