BE MORE THAN A NUMBER

NEUROSURGERY

WE'VE GOT YOU COVERED FOR YOUR FUTURE

Life looks very different to what I imagined when I was 15. My parents sent me education as the key to breaking the biggest poverty cycle. They could think me anything, but they could never see with my maths.

The perfect or worse than that for a good healthy growth for both sides and here we go. I might mistake for a more pharmacist or a doctor staff to patients. The world is changing though, and more women are graduating from medicine than than 20 years ago.
