BE MORE THAN A NUMBER

ARCHITECT

I GREW UP SURROUNDED BY BEAUTIFUL BUILDINGS...

Architecture was the obvious path for me. As I've grown older I've fallen in love with heritage restoration, which brings new life to iconic buildings around the world.

There's beauty in the maths and geometry that informs architecture. Maths has been used in design for centuries. Buildings designed with the perfect ratio create harmony and make a space work.

From drawing roofs and angles to scaling plans or calculating if a window complies with size regulations, maths plays a huge role in my day.
