BE MORE THAN A NUMBER

RISK ANALYST

WHAT DOES MY DAY INVOLVE?

As a risk analyst, I work on a variety of projects, designs and strategies. To be honest, I never really knew what I wanted to do. That's why I love working with startups -- I get to do a bit of everything.

From planning and forecasting, to analysis and operations, risk management and insurance, and controlling all factors, I'm the go-to numbers person.

What a company is in its early stages, making sure the numbers add up can mean the difference between success or failure.
