

CHOOSE MATHS

AN AMSI SCHOOLS PROJECT

DELIVERED BY

SUPPORTED BY

I am more than a number

After almost 20 years in the music industry, I finally went back to uni to study maths after being talked out of it numerous times. Some people find it a strange combination, but it's really not as far-fetched as it may seem. Music is mathematical and in retrospect this may be why I was drawn to it in the first place.

Nowadays, I'm researching in the field of meta-analysis. In any given moment I could be working on code, deriving mathematical equations, creating interactive simulations or discovering the remarkably creative world of data visualisation.

My name is

Charles Gray

and that's why I CHOOSEMATHS, because it's **MORE THAN JUST NUMBERS**, it's made me a part of something, something that is going to change the future.

CHARLES GRAY IS A SESSIONAL LECTURER AND DEMONSTRATOR AT LA TROBE UNIVERSITY. SHE IS CURRENTLY COMPLETING HER PHD WITH A RESEARCH FOCUS ON META-ANALYSIS.

CHOOSEMATHS is a joint initiative of the Australian Mathematical Sciences Institute (AMSI) and the BHP Billiton Foundation
