

A portrait of Saskia Freytag, a woman with blonde hair and glasses, wearing a dark button-down shirt, with her arms crossed. The background is a dark, textured grey.

I AM MORE THAN A NUMBER

I grew up in Germany and spent weekends conducting experiments with my dad and investigating the theories behind them.

Teachers I didn't like told me some types of experiments, but I still love learning for success and making sense of complex problems.

The human mind is one of the final frontiers of science and I use data and mathematical models to explore what we never thought possible.

My name is

**SASKIA
FREYTAG**

and that's why **CHOOSE MATHS**, because it's **MORE THAN JUST NUMBERS**. I will show up to complete our picture of how the human brain works.

**CHOOSE
MATHS**

CHANGING SCIENCE
