TRANSPORT & LOGISTICS

Living in a global community means moving billions of people, goods and services throughout the world. Maths, technology and data analysis is transforming the journey from A to B.

Big data changes the way we make decisions in the transport industry and is not only solving our traffic and transport woes, but transforming the way we move throughout the world.

Closer to home, urban living means an extra strain on major cities and transport infrastructure such as roads and rail networks. Just moving people to and from school and work every day has become a delicate numbers game as we use mathematics to manage sprawling networks.
